

**DESIGN TECHNOLOGY
STANDARD LEVEL
PAPER 1**

Monday 20 May 2002 (afternoon)

45 minutes

INSTRUCTIONS TO CANDIDATES

- Do not open this examination paper until instructed to do so.
- Answer all the questions.
- For each question, choose the answer you consider to be the best and indicate your choice on the answer sheet provided.

1. Which symbol is used to represent input/output in a flow chart?

2. What could be represented by an algorithm?

- A. A range of design ideas
- B. An algebraic equation
- C. A sequence of instructions
- D. A complicated electronic system

3. Which tool would a designer use for analysing complicated electronic systems?

- A. A processing block diagram
- B. An algorithm
- C. An orthographic sketch
- D. A 3D sketch

4. Which types of thinking are most important when developing the final details of a design?

- I. Analytical
- II. Convergent
- III. Divergent

- A. I and II
- B. II and III
- C. I and III
- D. I, II and III

5. Which is an example of symbolic modelling?
- A. A wooden replica of a proposed new object
 - B. A computer spreadsheet
 - C. A folded paper model
 - D. A computer-generated 3D representation
6. Which is likely to be the **least** significant design consideration in planning an office layout?
- A. Smell
 - B. Sound
 - C. Light
 - D. Colour
7. Which percentile range would be used to design a new playground ride?
- A. 99th percentile
 - B. 95th percentile
 - C. 50th percentile
 - D. 5th percentile
8. Which strategy ensures a continuing market for products and enables the incorporation of new technologies in later versions?
- A. Responsible Designing
 - B. Social Engineering
 - C. Planned Obsolescence
 - D. Scientific Marketing

9. Which statement does **not** reflect social responsibility in design?
- A. Material use
 - B. Recyclability
 - C. Energy use
 - D. Aesthetics
10. When producing a range of new toys a designer has to appeal to both children and parents. Which consideration is **most** likely to influence the parent?
- A. Safety
 - B. Feel
 - C. Smell
 - D. Colour
11. Which is a mechanical property of a material?
- A. Density
 - B. Hardness
 - C. Stiffness
 - D. Thermal Conductivity
12. Which material property uses units of $\text{Wm}^{-1} \text{K}^{-1}$?
- A. Density
 - B. Thermal expansion
 - C. Thermal conductivity
 - D. Electrical resistance.

13. Which material group **cannot** be shaped by moulding?

- A. Metals
- B. Timber
- C. Food
- D. Ceramics

14. What defines toughness?

- A. A mixture of materials, one of which is plastic
- B. The ability of the material to resist deterioration in a damp environment
- C. The ability of the material to resist the propagation of cracks
- D. The resistance of the material to abrasion

15. Which statements are true of a woven fabric?

- I. Made up of a number of interlocked threads
 - II. Can be fastened by stitching
 - III. Must be cut by machine
- A. I, II and III
 - B. I and III
 - C. II and III
 - D. I and II

16. What is defined as a general term for making products covering a range of techniques?

- A. Mechanisation
- B. Manufacturing process
- C. Manufacturing technique
- D. Machining

17. How would the body of the product shown below be produced?

- A. Casting
- B. Machining
- C. Weaving
- D. Extruding

18. Which material group has the following properties?

| | |
|-----------------------|-----------|
| Density | High |
| Electrical Resistance | Very low |
| Toughness | Very high |
| Thermal Conductivity | High |
| Stiffness | High |

- A. Food
- B. Metals
- C. Ceramics
- D. Plastics

19. Why are new materials produced?

- A. Materials with the required properties do not exist.
- B. Consumers demand new things.
- C. To create consumer demand.
- D. To use scientific resources.

20. What is a composite?

- A. A material made up of small pieces joined together
- B. A mixture of one or more metals
- C. A mixture composed of two or more materials with one substance acting as the matrix or glue
- D. A thermoplastic material able to withstand high impact loads

21. Which combination of “relative value” and “market demand” is generally true of craft-produced items?

| | Relative Value | Market Demand |
|----|-----------------------|----------------------|
| A. | High | High |
| B. | High | Low |
| C. | Low | High |
| D. | Low | Low |

22. Which are examples of one off production?

- I. A mould for an injection moulding machine
- II. A scale model of a proposed new product
- III. An exhibition stand and display

- A. I and II
- B. II and III
- C. I and III
- D. I, II and III

23. Which combination of “number of items being disposed of” and “value of materials” encourages recycling?

| | Number of items being disposed of | Value of recycled materials |
|----|--|------------------------------------|
| A. | Low | Low |
| B. | Low | High |
| C. | High | Low |
| D. | High | High |

24. Which are variable costs?

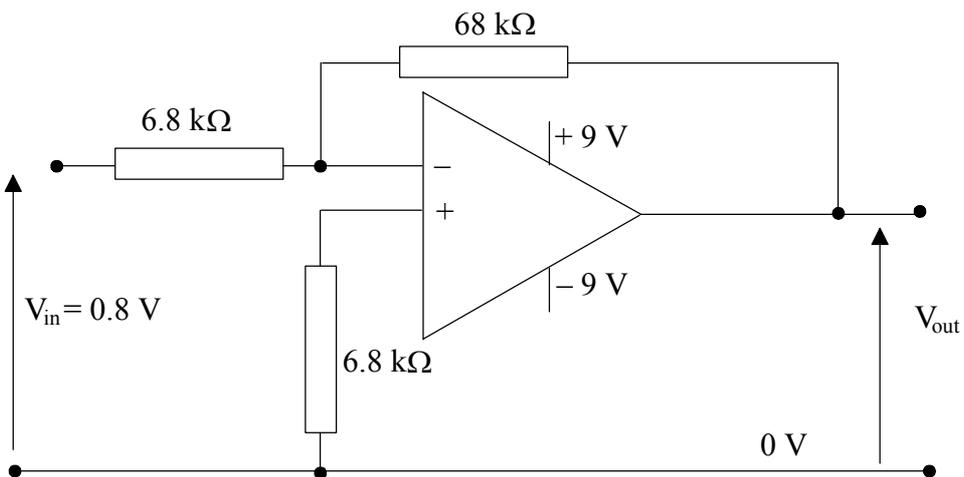

- A. Capital costs
- B. Design costs
- C. Material costs
- D. Plant and machinery costs

25. Which statements describe a NAND gate?

- I. It has two or more inputs
- II. 
- III. It performs the AND function and inverts the output

- A. I and II
- B. I and III
- C. II and III
- D. I, II and III

26. What is the output voltage (V_{out}) for the operational amplifier circuit shown below?

- A. 0.08 V
- B. - 8 V
- C. 8 V
- D. - 80 V

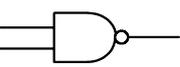

27. Which statements are true of a closed loop system?

- I. A reference signal is compared with a feedback signal so that a control action can be performed.
- II. An analogue signal is converted to a digital signal.
- III. A non-electrical signal is converted into an electrical signal.

- A. I only
- B. II only
- C. III only
- D. I and II

28. Which logic gate has the truth table shown below?

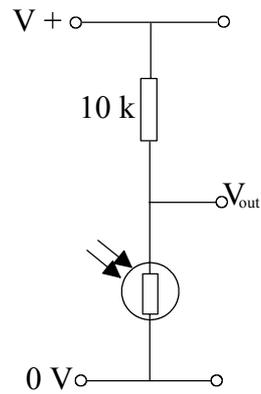

| Input | | Output |
|-------|---|--------|
| A | B | |
| 0 | 0 | 1 |
| 0 | 1 | 0 |
| 1 | 0 | 0 |
| 1 | 1 | 0 |

- A. 
- B. 
- C. 
- D. 

29. What is the function of a transducer?

- A. It changes an analogue signal to a digital signal.
- B. It changes a non-electrical signal into an electrical signal or vice versa.
- C. It changes a low voltage to a higher voltage.
- D. It amplifies a signal so that it can be detected.

30. Which term describes the output (V_{out}) from the circuit shown below?

- A. Analogue
 - B. Open loop
 - C. Digital
 - D. Feedback
-
